Art Unit: 3644

DETAILED ACTION

1. Newly submitted claims 7-17 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims 1, 2, 5, 6, 16 and 17 drawn to a protective enclosure, classified in class 47, subclass 20.1.
- I. Claims 7-15, drawn to a kit, classified in class 135, subclass 115.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a camping tent. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7-15 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the

Art Unit: 3644

invention. The phrase, "without being affixed to said cover," in line 12 is indefinite as it is unclear whether the cover is not affixed to the "hold-downs" or the "arches."

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 1, 2, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hammond (US 4,442,626).

Hammond discloses a protective enclosure for a row of garden plants comprising a plurality of semi-circular arches 1, each having first and second ends insertable into soil. A cover 10, having an inside and outside, is draped over the arches 1 and held in place by a plurality of hold-downs 3. The hold-downs 3 are extendable over an outside of cover 10 at each of said arches 1, and anchored in each arch through aperture 6.

8. Claims 1, and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Olshansky (US 2,889,664).

Olshansky discloses a protective enclosure for a row of garden plants comprising a plurality of semi-circular arches 12, each having first and second ends insertable into soil. A cover 13, having an inside and outside, is draped over the arches 12 and held on the arches by plurality of hold-downs 22. The hold-downs 22 are extendable over an outside of cover 11 at each of said arches 12, and anchored on each arch (Figure 4).

Art Unit: 3644

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hammond, as applied to claims 1, 2 and 16 above

Hammond discloses the claimed invention except the hold downs are not positively disclosed as being made of an elastic material, but rather a metal wire. Hammond teaches that a more flexible hold down may be utilized and anchored on arch 1 via lugs 12 and 14 (Hammond, col.2, lns.40-53). It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the wire hold down with an elastic hold down as suggested by Hammond, since an elastic member may not damage the plastic cover 10 as easily.

Regarding claim 6, the cover includes a base shield 10 and a plurality of ventilation panels defined as any area exposed by optionally lifting the base shield 10 up from the ground and bunching said shield 10 up between said hold-downs 3 and said arches 1.

Response to Arguments

9. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new grounds of rejection.

Art Unit: 3644

Conclusion

Page 5

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan C. Alimenti whose telephone number is 703-306-0360. The examiner can normally be reached on Monday-Friday, 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 703-305-7421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
